

Dr Chris Baker, RN, DMD

'Beauty and the Beast... or Beast and Beauty'?

This is a 'sneak peek' into the 20 Hour ADA CERP course in sagittal (anterior-posterior) correction, orthodontic correction for the Class II and Class III patient. In this 'preview course', you will earn 2 ADA CERP credits upon completion of the exercise at the end of this course.

Let me ask you...

Do you find that treating the Class II or Class III patient to present challenges for you?

Do you feel more comfortable with the treatment of Class I's?

Are you more comfortable treating patients with a relative Class I posterior occlusion who may have other orthodontic needs - alignment, spacing, crowding and the like?

Do you find Class I patients to be more fulfilling, more fun, in the treatment?

Do you find compliance a problem in sagittal AP correction? Usually you're asking for some kind of help from the patient in correcting the problem.

What is your biggest problem in sagittal correction?

These questions are answered in this short course, and in much greater detail in the 20-Hour ADA CERP course I'm teaching following this one.

Join us, now, and let's have some fun!

This can revolutionize the way you do orthodontics!

A handwritten signature in black ink that reads "Dr. Chris". The "Dr." is written in a simple, slightly slanted font, followed by a period. "Chris" is written in a more fluid, cursive style with a large, rounded "C" and a small "i" with a dot.
